ABOUT

Motion and creative designer in affiliate marketing since 2024. I make video and static creatives, landing pages and prelanders for gambling and crypto on Facebook and Google, across Tier 1, 2 and 3 geos. I build creatives around hook – retention – CTA, produce variations for testing and refine them based on CTR/CR feedback from media buyers. AI production: video and avatars (Kling, Seedance, NanoBanana), voiceover and lip sync in the local language (ElevenLabs, Fish Audio), node-based pipelines for mass variations (Figma Weave, ComfyUI). For six months I led a design team of 10+ people, so I understand the process from both the media buyer's and the lead's side, work from short briefs and propose hypotheses myself. Now looking for a role focused on producing and testing creatives.

Gambling / iGaming | Crypto | Nutra | Facebook Ads | Google Ads | Tier 1, 2, 3 geos | AI UGC | Lip sync | English B2

EXPERIENCE

Creative / Motion Designer — Aug 2024 – Mar 2026, 1 yr 8 mos

Affiliate media buying team (NDA), gambling, crypto, nutra, Facebook, Google

- Produced video and static creatives for gambling and crypto: on average 3 unique videos and 30+ variations and resizes per day; formats 9:16, 1:1, 3:4, 16:9.
- Localized creatives for Tier 1, 2 and 3 geos: copy, currencies and win amounts, payment methods, voiceover in the local language.
- Animated interfaces: balance growth, bonuses, captions, CTAs.
- Brought AI video into production: AI avatars and UGC videos (Kling, Seedance, Higgsfield), voiceover and lip sync (ElevenLabs, Fish Audio). Average time to localize one video dropped from 2 hours to 30 minutes.
- Worked with media buyers in a cycle of test, CTR/CR review and new iteration. Changed hooks, the first 3 seconds and how the offer is presented.
- Analyzed funnels in spy tools (AdSpy, Tyver), collected references and suggested hypotheses on hooks, angles and delivery to media buyers; wrote creative briefs.
- Built landing pages and prelanders (including quizzes) in Tilda, Figma and Claude to match the creative's message.

Team Lead, Design Department — Mar 2026 – Sep 2026, 7 mos

Same team, a department of 10+ designers (motion, static, landing pages)

- Introduced a KPI system for the department (output and creative quality) and a workflow: brief, review, delivery. Communication with media buyers became clearer, with fewer revisions and edits.
- Ran creative reviews and workshops on how performance creatives work (CTR/CPC/CR/ROI, hypothesis iterations, buyer–designer collaboration).
- Organized joint brainstorms for media buyers and designers; took part in hiring and onboarding motion designers.

SKILLS

Motion & video: After Effects, CapCut, motion graphics, video editing, UI animation

Design: Figma, Photoshop, Tilda, landing pages and prelanders, static creatives and banners

AI: Kling, Seedance, NanoBanana, Higgsfield, ElevenLabs, Fish Audio, Figma Weave, ComfyUI, Claude, AI avatars, lip sync

Performance: CTR, CR, CPC, ROI, A/B tests, hook / retention / CTA, creative fatigue and rotation, spy tools (AdSpy, Tyver), creative briefs
